

Equipment for Hire / Trial

March 2026

Welcome to Unity OT Equipment Hire

At Unity OT, we know having access to the right equipment can make all the difference to a person's comfort, safety, and independence.

Unity OT provides a range of equipment available for short-term hire, trials, and interim solutions while waiting for funding approvals.

Our OT led equipment hire service is designed to support:

- Hospital discharges requiring urgent equipment
- Participants waiting for NDIS funding approvals
- Short-term equipment needs
- Trial of equipment before purchase

You don't need to be an existing Unity OT customer to hire equipment from us*.

Why people use Unity OT equipment hire

- Quick access to equipment when timing matters
- OT-led setup and adjustment to ensure suitability
- Trial equipment before committing to purchase
- Options available through NDIS, Aged Care, or private hire

*Depending on equipment type and customer complexity an OT may need to be present for delivery

How Equipment Hire Works

Choose the equipment

Browse the catalogue and select the item you need. If you're unsure what may be most suitable, feel free to contact us — we're always happy to discuss options.

Contact Unity OT

Let us know the equipment required and the expected hire period. We offer flexible short and long-term hire options.

Delivery and Setup

We deliver the equipment, install it, and adjust it to ensure it is safe and suitable for the user. A hire agreement outlining the costs and terms will be emailed prior to delivery.

During the Hire Period

Unity OT is responsible for equipment servicing and safety checks.

The hirer is responsible for safe day-to-day use and notifying us promptly if any issues arise.

When the Hire Ends

When the hire period finishes, Unity OT will arrange collection of the equipment and prepare it for the next hire.

Welcome to Unity OT Equipment Trial

At Unity OT we recognise not all equipment is available to trial before purchase

We offer short term trial periods of products to ensure it is suitable and/or comfortable before being purchased. One of our Occupational Therapists will visit to deliver the items, provide education, and set up the product to ensure you can make the most of the trial.

See the equipment for trial page in this catalogue.

Reachable Technology – OmniCuff

The OmniCuff is designed for people with adaptive hand needs. It provides the ability to hold and use everyday objects with ease. The system uses powerful magnets to clip on to the tools needed.

The carousel of tools can be clamped to most surfaces and wheelchairs. The user has a strap that can go around their desired limb, which has a magnetic attachment that is used to grab on to the item needed i.e., fork, phone attachment, drinking cup, hairbrush.

Unity OT have sourced this innovative product from Reachable Technology in the USA, and we are available to demonstrate to you in team meetings or with your customer directly.

Pictures don't do it justice. Check out some real-life examples of the product in use via [Reachable Technology Website](#) and [Instagram](#)
